Skills

Languages: C++, Python, JavaScript (ES6+)
Frameworks & Technologies: React, Node.js, Express.js, HTML, CSS
Databases: MySQL, MongoDB
Core CS: Data Structures, Algorithms, OOP, DBMS
Tools: Git/GitHub, Postman
AI/LLM: LLM APIs, Prompt Engineering, RAG, Embeddings

Projects

Ai Mock Interview Platform | Gemini API, React.js, Node.js, MongoDB Jun 2026
GitHub Link | Live Link

- Developed a full-stack **AI-powered** mock interview platform that conducts role-based technical interviews and generates personalized performance reports.
- Integrated Google **Gemini API** to generate contextual interview questions, evaluate candidate responses, ask follow-up questions, and produce AI-driven feedback with strengths, weaknesses, and improvement areas.
- Implemented voice-based interview interaction using **Web Speech API (Speech Recognition and Speech Synthesis)** for a realistic interview experience.
- Built scalable RESTful APIs using Node.js and Express.js following a modular architecture with controllers, routes, services, and database models.
- Designed a responsive React.js frontend with authentication, interview workflow, and detailed report dashboard for users.

Internshala Automation | React.js, Node.js, Puppeteer MongoDB Jan 2026
GitHub Link

- Automated end-to-end internship applications using Puppeteer, reducing application completion time from **10 minutes to under 1 minute** through browser automation.
- Built secure **JWT**-based authentication with MongoDB for storing user data and resumes
- Implemented **auto-resume generation** and centralized dashboard to track applications
- Built Puppeteer automation workflows to automate login, form filling, resume upload, and internship application submission.
- Designed scalable MERN architecture with responsive React UI and optimized Node.js APIs

Experience

Summer Intern — Celebal Technologies Jun 2025 – Aug 2025

- Developed and shipped **8+ reusable** React.js UI components (such as tables, inputs, and modals) for an internal dashboard, ensuring consistent styling and styling guidelines across the project.
- Integrated RESTful APIs with React.js components to build dynamic, data-driven user interfaces.
- Collaborated with developers using Git to deliver assigned frontend features across multiple projects.

Education

B.Tech in Computer Science & Engineering — Vivekananda Global University 2023 – 2027

Achievements

- LeetCode Contestant: Rated **1460+** in global algorithmic contests.
- Contributed **50+** pull requests to the DevDisplay open-source project.
